44. It is odd that in animals organs for
conservation of life are important in plants
organs of reproduction. - But a flower is
more than organ.

58. Good remark how arbitrary the distinction
between race & species is.

62 alludes to conditions.

[In Preface ask whether from earliest ^{age} ~~time~~
there can have been derivation of climate
concomitantly to any change in
organisms on earth's face]

Very poor & useless Book
